

STUDENT FEEDBACK

Patricia Dirwayi (Millwright Private Student)

I have been with SAJ from 2016, I did my N1 up to N3 and passed with flying colours. It was because of the competent lecturers who are willing to help. I started my institutionalised training as a millwright in January 2018 and the training is so interesting and exciting because the facilitators are also competent and helpful

Ethan Marais (Fitter & Turner)

Hi guys my name is Ethan Marais I am here today to tell you about the benefits of attending at SAJ College, which is in Wadeville. I started at SAJ soon after completing my matric. During nated classes, I received one on one lessons after classes. In the next coming week, I will be doing my trade test. The SAJ sent me to Mc Cain foods for a placement after completing my nated courses. I would not hesitate to recommend any student, young or old to attend at SAJ, it is certain that by attending at The SAJ you come out as a great artisan.

Nkosephayo Mhlambi (Millwright)

I have been part of the SAJ Competency Training Institute from 2015 till today. I started doing my studies in electrical and mechanical to pursue my dream of becoming a qualified millwright. The facilitators here have shown kindness, humility and love. They have guided me every step of the way in my theoretical studies as well as my practical training. As a private trainee, I am gaining a lot of practical training and also believe that by the time I'm done with my training here, I'll be competent enough for any company seeking for a millwright artisan

Imraan Paulse (Boiler maker Apprentice)

I have been at The SAJ Competency Training Institute for two years now; I did N1 and N2 in boiler making and am presently doing a boiler making apprenticeship. I personally found that everything I was told about The SAJ to be true, from excellent facilitators to very good training facilities. Friendly and helpful staff is always willing to go the extra mile to ensure we produce great results at the end of our nated courses and apprenticeships.
